

#3

CLAIMS

1. An unmanned vehicle for displacing manure, comprising a steering unit for steering the vehicle, a frame (1) and a propelling unit (2) for propelling the unmanned vehicle, as well as manure displacing means for displacing manure, characterized in that the manure displacing means are fitted to the unmanned vehicle in such a manner that they are indispensable for supporting and/or propelling the vehicle.
- 10 2. An unmanned vehicle for displacing manure, comprising a steering unit for steering the vehicle, a frame (1) and first and second supporting means for supporting the frame on the ground, the first supporting means being rollable relative to the floor and located in one approximately vertical plane
- 15 whilst being coupled to a propelling unit (2) for propelling the unmanned vehicle, characterized in that the total weight of the vehicle bears on the first and second supporting means, and the second supporting means comprise manure displacing means for displacing manure.
- 20 3. An unmanned vehicle as claimed in claim 1 or 2, characterized in that the unmanned vehicle comprises a steering unit which is constituted by the propelling unit (2) which comprises at least one rotatable propelling member (4).
4. An unmanned vehicle as claimed in claim 1 or 2,
- 25 characterized in that the unmanned vehicle comprises a steering unit which is constituted by the propelling unit (2) which comprises at least two independently driven propelling members (4).
5. An unmanned vehicle as claimed in claim 3 or 4,
- 30 characterized in that the propelling member (4) comprises a wheel and/or a caterpillar track.
6. An unmanned vehicle as claimed in any one of the preceding claims, characterized in that the unmanned vehicle is equipped with orientation means for following a path in a space or determining the position of the vehicle in a space,
- 35 such as a stable or a meadow.
